WORK EXPERIENCE

AMAZON | Payments - Software Development Engineer II **Jan 2024 – Present**

- Design payment outage system on AWS CDK with in-memory cache for **sub-millisecond lookups** and 99.99% uptime
- Develop credit/debit card software for Mexico, Brazil, and Japan marketplaces serving **300,000+ active users**
- Automate B2B contractual accounting and partner banking, eliminating **1,000+ hours/year** of manual effort
- Modernize legacy payment services with agentic AI workflows, achieving **2x faster development output**
- Own **operational excellence** (tickets, tests, CI/CD) with QA, PMs, and stakeholders in emerging markets

AMAZON | Alexa Discovery Engine - Software Development Engineer Intern **May 2022 – Aug 2022**

- Led A/B testing for voice ingress points in Alexa's Discovery Engine, reaching **10M+ Alexa users**
- Built Java configuration software for Alexa using **dependency injection** and AWS/internal tools
- Handled, routed, and analyzed traffic from **millions of customers**, informing future Alexa releases

SOUTHERN CALIFORNIA EDISON (SCE) | Software Engineer Intern **May 2021 – Aug 2021**

- Directed **collection and extrapolation of 2020 data** from SCE's photovoltaic (PV) circuits
- Coordinated IT teams, field engineers, and back-end developers to resolve circuit-specific anomalies
- Built **Python scripts (Pandas, NumPy)** for reliability analysis of PV activity supporting **SCE's 100% renewable goal by 2045**

NASA KENNEDY SPACE CENTER (KSC) | Software Engineer Intern **Jan 2021 – Apr 2021**

- Redesigned an outdated graphic engine in the NE-XS division, supporting the **Artemis II launch**
- Engineered a real-time graphic engine for **firing room displays** using Java Swing and JavaFX
- Presented display prototypes showing gains in functionality, readability, speed, and efficiency

EDUCATION

B.S. Computer Science - Mathematics Minor **GPA:** 4.0 **Graduation Date:** May 2023
California State University - Fullerton

PROJECTS

STL Complexity Analysis	Benchmarked efficiency of C++ STL vectors, maps, binary trees, and linked lists
Sorting Visualizer	Real-time visualizer for bubble, selection, insertion, and merge sort in C++ (SFML)
TEDx CSUF Website	Organization website promoting TEDx CSUF events, built with HTML, CSS, and PHP
Running Database	Java Swing app tracking runner data for a cross-country coach, using polymorphism

LEADERSHIP

ASSOCIATION FOR COMPUTING MACHINERY (ACM) | Algo President **Aug 2021 – May 2023**

- Led the largest computer science organization on campus, with **1,000+ students**
- Taught data structures, algorithms, and interview prep to students from beginner to industry-ready

TEDX CSUF | Vice President **Dec 2019 – Aug 2021**

- Provided a creative platform for CSUF students and faculty to encourage public speaking
- Hosted **large-scale TEDx events** bringing together students and professionals across Southern California

PRESIDENT'S SCHOLAR | Scholarship Recipient and Mentor **Aug 2019 – May 2023**

- Received a prestigious **full-ride scholarship** for exemplary service, leadership, and academics
- Served as a CSUF ambassador at service, social, and sponsorship events in the community

SKILLS

Languages	Java, Kotlin, Python (Pandas, NumPy, SciPy), C++, R, React, Git, Linux
AWS	AWS CDK, Lambda, EC2, S3, DynamoDB, CloudFormation, CloudWatch, SNS, SQS
AI Tools	Claude Code (Opus, Sonnet, Fable), ChatGPT (GPT-5.6 Sol), Kiro, Cursor, Copilot, Amazon Q, Ralph Loops, Skills, Agents, MCP, Prompt-Driven Development
